

Osama Mahmoud Mohamed

Software Engineer | Flutter

osama255955@gmail.com | +201150721902 | Cairo | [Osama Mahmoud](#) | [Portfolio](#) | [Github](#)

Profile

High-performing Flutter Developer with 3 years of professional experience engineering scalable, secure, and production-ready cross-platform mobile applications. Proven track record in structuring modular codebases using Clean Architecture and advanced state management (BLoC, Cubit). Specialized in DevOps & CI/CD automation (Shorebird, Fastlane) and Mobile Security & Pentesting (network/storage vulnerability mitigation). Adept at utilizing AI toolchains & MCP clients to accelerate planning and maintain rigorous code quality monitoring.

Work Experience

Flutter Developer — Systm Gulf

Cairo, Egypt | Jan 2024 – Present

- Architected scalable mobile applications from scratch using Clean Architecture and BLoC, ensuring modularity and long-term maintainability.
- Integrated complex RESTful APIs, Firebase services, and location-based background tracking systems for enterprise client solutions.
- Automated build, test, and release deployment cycles using Fastlane and Codemagic, cutting distribution time by 40%.
- Enforced code quality standards through strict pull-request reviews, unit testing, and robust memory management.

Flutter Developer — TOT Platform (Outsourced via Systm Gulf)

Cairo, Egypt | Apr 2026 – Present

- Spearhead frontend feature delivery for an enterprise cross-platform application, optimizing rendering performance and UI responsiveness.
- Collaborate closely with backend, product, and QA teams across agile sprints to implement scalable business logic and clean API integrations.
- Mitigate security vulnerabilities by embedding secure local storage, authentication guards, and encrypted network communication.

Flutter Developer — Haseem Company

Remotely | Apr 2026 – Present

- Engineered a cloud accounting and multi-tenant SaaS invoicing application published to both the Apple App Store and Google Play.
- Implemented standardized electronic document rendering and digital invoice archiving systems compliant with regulatory tax authority standards.
- Integrated Shorebird Code Push pipelines to execute instant over-the-air bug fixes and feature updates without App Store delays.

Flutter Developer — Freelance

Remotely | Jul 2024 – Present

- Built and delivered complete end-to-end mobile applications for international clients across e-commerce, education, and utility domains.
- Implemented payment gateways (Stripe, PayPal), push notifications, custom interactive animations, and responsive layouts.
- Managed the full app lifecycle from design extraction (Figma) to production release on the Google Play Store and Apple App Store.

Technical Skills

Core & Frameworks: — Dart, Flutter, RESTful APIs, GraphQL, gRPC, Python, JavaScript, C++, PHP

Architecture & State: — Clean Architecture, MVVM, BLoC, Cubit, Provider, GetX, Design Patterns

Mobile Security: — Frida, App Tools, Burp Suite, Network Security, SSL Pinning, Storage Encryption (Secure | Storage)

DevOps & CI-CD: — Shorebird (Code Push), Fastlane, GitHub Actions, Codemagic, Multi-Environment Flavors

Data & Storage: — Firebase (Firestore, Realtime DB, FCM), SQLite, Hive Local Storage, Shared Preferences

Testing & QA: — Unit Testing, Widget Testing, Integration Testing, TestFlight, Firebase App Distribution

Tools & Project: — Jira, Linear, ClickUp, Trello, Git, Google Maps API, Biometric Authentication, Stripe, PayPal

AI & MCP Tools: — Advanced Software Planning/Code Monitoring using AI assistants, Figma MCP, Postman | MCP

Education

Bachelor's Degree in Management Information Systems,
Helwan University

2020 – 2024

Projects

Haseem (حسيم) – FinTech Cloud Invoicing Platform

-  [App Store](#) 
-  [Google play](#) 
- Developed a complete SaaS financial invoicing app allowing merchants to generate e-invoices, manage operational expenses, and archive digital receipts.
- Implemented custom enterprise PDF/document rendering engines configured for regional tax compliance.
- *Tech Stack*: Flutter, Dart, BLoC, Clean Architecture, REST APIs, Secure Storage, Shorebird.

Checkpoint – HR & Attendance System

- Built a real-time GPS check-in/check-out system featuring dynamic geofencing and anti-spoofing location verification.
- Implemented role-based dashboards (Employee, Supervisor, Admin) to digitize leave management and automated attendance reporting.
- *Tech Stack*: Flutter, Dart, Clean Architecture, Google Maps API, Firebase, REST APIs.

El-Beda'a (البضاعة) – Construction Marketplace App

-  [Google Play](#) 
-  [App Store](#) 
- Built a high-traffic B2B/B2C marketplace connecting construction material suppliers and contractors, achieving 5,000+ downloads.
- Implemented deeply nested category navigation, optimized multi-parameter search, and secure payment workflows.
- *Tech Stack*: Flutter, Dart, Cubit, REST APIs, Firebase FCM, Multi-Image Caching.

Enjaz – Multi-Vendor E-commerce Platform

-  [App Store](#) 
-  [Google play](#) 
- Developed a multi-app ecosystem comprising dedicated interfaces for customers, vendors, and delivery drivers.
- Implemented real-time order tracking, route mapping via Google Maps API, and automated order assignment pipelines.
- *Tech Stack*: Flutter, Dart, BLoC, WebSockets, Firebase Realtime DB, Google Maps API.

Altajwid Almuysar App

-  [Google Play](#) 
- Engineered an educational application reaching 5,000+ active downloads featuring multi-threaded offline media caching.
- Implemented asynchronous PDF rendering alongside background-buffered audio/video streaming pipelines.
- *Tech Stack*: Flutter, Dart, Hive, Background Audio Service, PDF Engine.

Tawreda – E-commerce & Investment Platform

-  [Google Play](#) 
-  [App Store](#) 
- Designed an e-commerce platform incorporating an investment resale module with real-time product price tracking.
- Implemented persistent cart state, wishlist synchronization, and secure checkout architecture.
- *Tech Stack*: Flutter, Dart, Clean Architecture, BLoC, Payment Gateways.
