PROFILE

Flutter Developer with 2+ years of experience shipping production apps to the App Store and Google Play: five store-published products across fintech invoicing, e-commerce and education, one past 10,000 downloads and one past 5,000, plus a multi-tenant HR & attendance SaaS (mobile, web and Super Admin) used by 5 companies across multiple industries. Works with Clean Architecture and BLoC, ships through Fastlane, Codemagic and Shorebird, builds in secure storage and encrypted networking, and works AI-first with Claude Code, project rules, custom skills and MCP tools.

WORK EXPERIENCE

Flutter Developer — Systm Gulf (Full-time) 11/2024 – Present | Cairo, Egypt

- Built Checkpoint, a multi-tenant HR & attendance SaaS: the Flutter app, the web dashboard, the Super Admin platform and the landing page.
- Integrated REST APIs, Firebase services and location-based background tracking for enterprise clients.
- Automated build, test and release with Fastlane and Codemagic, cutting distribution time by 40%.
- Reviewed teammates' pull requests, wrote unit tests and applied memory-management practices to keep code quality high.

Assignment: TOT Platform *(Systm Gulf's technical arm)* *04/2026 – 09/2026 | Cairo, Egypt*

- Owned frontend feature delivery for an enterprise cross-platform app and improved rendering performance and UI responsiveness.
- Worked with backend, product and QA teams in agile sprints to implement business logic and API integrations.
- Hardened the app with secure local storage, authentication guards and encrypted network communication.

Flutter Developer — Haseem Company (Part-time) 04/2026 – Present | Remote

- Built a multi-tenant SaaS cloud accounting and invoicing app, published on the App Store and Google Play.
- Implemented e-invoice document rendering and digital invoice archiving that comply with tax authority requirements.
- Set up Shorebird Code Push for over-the-air bug fixes and feature updates without waiting for store review.

Flutter Developer — Freelance (alongside full-time roles) 07/2024 – Present | Remote

- Delivered end-to-end mobile apps for international clients in e-commerce, education and utility domains.
- Implemented Stripe and PayPal payments, push notifications, custom animations and responsive layouts.
- Owned the full lifecycle from Figma designs to production releases on Google Play and the App Store.

TECHNICAL SKILLS

Mobile: Dart, Flutter, REST APIs, GraphQL, gRPC

Architecture & State: Clean Architecture, MVVM, BLoC, Cubit, Provider, GetX

Data & Storage: Firebase (Firestore, Realtime DB, FCM), SQLite, Hive, Shared Preferences

Testing & QA: Unit, widget and integration testing, TestFlight, Firebase App Distribution

CI/CD: Fastlane, Codemagic, GitHub Actions, Shorebird Code Push, multi-environment flavors

Mobile Security: SSL pinning, secure storage encryption, biometric authentication, Frida, Burp Suite

Integrations: Google Maps API, Stripe, PayPal, WebSockets

AI-Assisted Development: Claude Code and AI coding assistants, project rules files (CLAUDE.md, .cursorrules), custom skills, MCP tools (Figma MCP, Postman MCP), lint and CI tests as guardrails

Tools: Git, Jira, Linear, ClickUp, Trello, Figma

Other Languages: Python, JavaScript, C++, PHP

EDUCATION

B.Sc. Management Information Systems — Helwan University 2020 – 2024 | Cairo, Egypt

PROJECTS

Haseem — FinTech Cloud Invoicing Platform | App Store · Google Play

- SaaS invoicing app that lets merchants generate e-invoices, manage operating expenses and archive digital receipts.
- Custom PDF/document rendering configured for regional tax compliance.
- *Tech Stack:* Flutter, Dart, BLoC, Clean Architecture, REST APIs, Secure Storage, Shorebird.

Checkpoint — Multi-Tenant HR & Attendance SaaS | Product page

- One app serves multiple companies, each isolated as its own tenant, managed from a central Super Admin platform.
- Built the Flutter mobile app, the web dashboard, the Super Admin platform and the marketing landing page.
- Real-time GPS check-in/check-out with dynamic geofencing and fake-location (anti-spoofing) detection.
- Real-time updates over WebSockets; role-based dashboards (Employee, Supervisor, Admin) for leave management and automated attendance reporting.
- *Tech Stack:* Flutter, Dart, Clean Architecture, WebSockets, Google Maps API, Firebase, REST APIs.

El-Beda'a — Construction Marketplace App | App Store · Google Play

- B2B/B2C marketplace connecting construction material suppliers and contractors; 5,000+ downloads.
- Nested category navigation, multi-parameter search and secure payment workflows.
- *Tech Stack:* Flutter, Dart, Cubit, REST APIs, Firebase FCM, image caching.

Enjaz — Multi-Vendor E-commerce Platform | App Store · Google Play

- Three-app ecosystem: customer, vendor and delivery-driver apps.
- Real-time order tracking, route mapping with Google Maps API and automated order assignment.
- *Tech Stack:* Flutter, Dart, BLoC, WebSockets, Firebase Realtime DB, Google Maps API.

Altajwid Almuysar — Educational App | Google Play

- Educational app with 10,000+ downloads and offline media caching.
- Asynchronous PDF rendering and background audio/video streaming.
- *Tech Stack:* Flutter, Dart, Hive, background audio service, PDF rendering.

Tawreda — E-commerce & Investment Platform | App Store · Google Play

- E-commerce platform with an investment resale module and real-time product price tracking.
- Persistent cart state, wishlist sync and secure checkout.
- *Tech Stack:* Flutter, Dart, Clean Architecture, BLoC, payment gateways.
